

TM TRUCK VIN

WHAT IS TM TRUCK VIN?

TM TRUCK VIN is the VIN (vehicle identification number) based **truck catalog from TOPMOTIVE**.

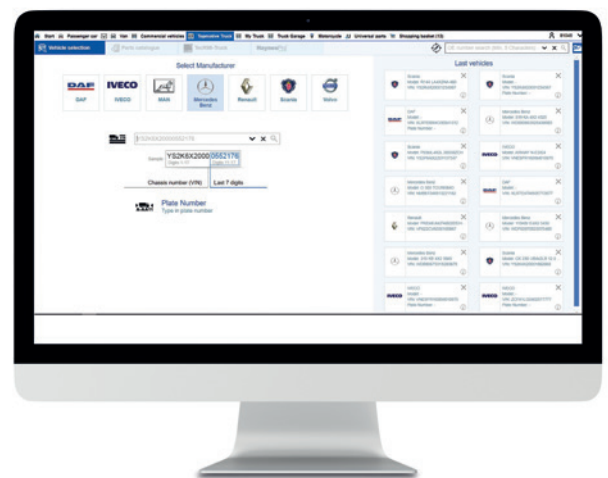

Dealers have the opportunity to identify OE numbers and to quickly and easily find the spare parts they are looking for due to a specially developed search logic on OE basis.

WHICH FUNCTIONS AND BENEFITS DOES TM TRUCK VIN PROVIDE?

By fully entering the **VIN** number or at least the last seven digits, you can directly access the products and assemblies of the respective manufacturers. By just a few clicks you will then receive a parts list incl. OE numbers of the required assembly. Based on the OE number, our system makes the jump to the IAM and provides a list of all parts manufacturers who have linked their articles accordingly.

The **BIG 7** in one system: DAF, IVECO, MAN, MERCEDES-BENZ, RENAULT, SCANIA & VOLVO

The use of the **parts catalog** enables workshops to identify spare parts efficiently. Furthermore, there is the option to activate technical data of HaynesPro „WorkshopData – Truck Edition“. Thus, your customers can realize the truck maintenance work a lot faster and easier – which leads to a more intense customer retention.
